enviro^oswim

Our incredible technology harnesses the power of electronic oxidation, ionisation and ultrasonics, working together in perfect harmony. Enviroswim effortlessly achieves what traditional pool sanitation systems struggle to accomplish. Say goodbye to chemical headaches and hello to a crystal-clear oasis in no time!

enviroswim
fresh water swimming pools

Sustainable

Reduces the use of chemicals.

Achieves water quality to drinking water standards. (NZ)

Wastewater can be repurposed for other uses such as irrigation.

Cost Effective

Chemical costs reduced.

Residual and effective sanitation methodology resulting in lower running costs and longer lasting equipment.

Non-corrosive water resulting in extended equipment and pool surrounds life span.

Certified

Tested and certified to **Australian (NATA)** and **US (NSF50)** government standards. This is our guarantee of safe and healthy water.

Tested and certified to Australian Electrical Safety Standards (**SAA**).

Industry tested for **20+ years with thousands of installations globally.**

Enviroswim unique, patented technology

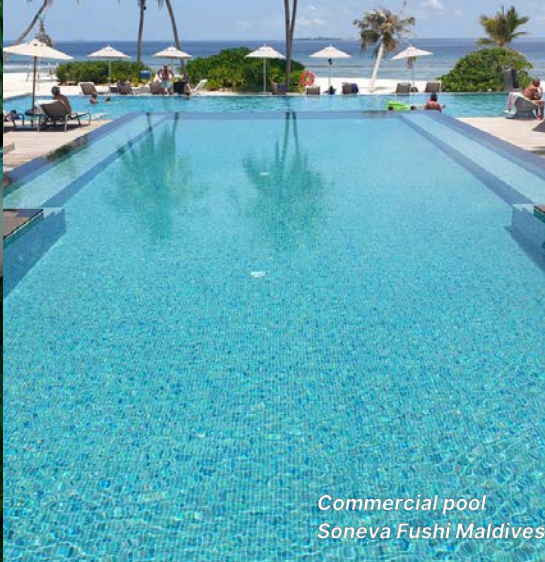

All Natural

No red eyes, irritated skin or respiratory system.

No chlorine smells or taste.

Just crystal clean freshwater that looks and feels amazing.
